

MB-0922

6' Baker Scaffold Mobile Base
with Stabil Stop™ Technology

**BASE ONLY.
Baker Scaffold NOT included.*

Releasing the handle raises the casters, locking the base in place automatically without the need to manually lock / unlock casters.

Mobile base doubles as a cart for fast, easy transport of scaffold set.

Integrated pin-locking outriggers deploy quickly to form a stable base.

Mobile base is compatible with most baker scaffold systems on the market.

WORKLIFT USA

TM

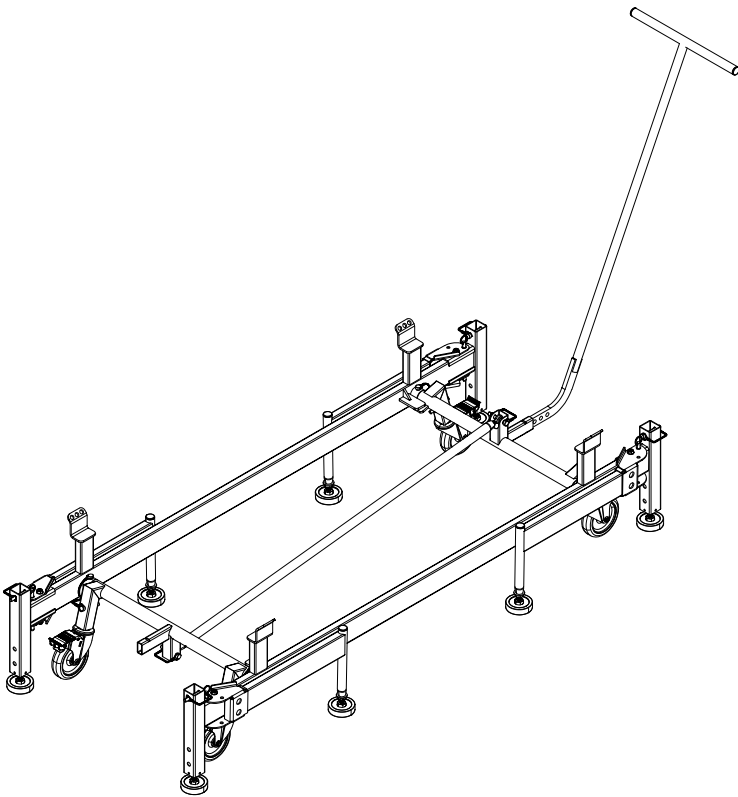

- ▶ **Fail-safe braking feature** - when handle is released, wheels retract, engaging feet to set scaffold in place
 - ▶ No need to manually lock/unlock casters
 - ▶ Enhanced roll-away protection
 - ▶ Increased tip-over protection
- ▶ **Significant time savings** - at least 15 min/day
- ▶ Maximum height: two scaffolding units
- ▶ Integral, easily deployed outriggers used at every height for improved stability, providing superior resistance to roll-away and tip-over
- ▶ Simplifies scaffold set-up and tear down
- ▶ Doubles as a cart for easy transport of scaffold
- ▶ **Made in USA**
